

DeXtraD Recruit

Do you operate a graduate employment scheme?

Do you need to check that potential recruits are numerate, literate and stable?

DeXtraD recruit is a web based system designed to help ensure you get the right people for the right job. With individual logins and passwords, ensuring that it's easy to keep track of results and ensuring the tests are taken when you need them to be taken

DeXtraD Recruit comes in a variety of bundles to suit all recruitment needs and budgets and can be administered wholly by our team, or by your own designated administrator, whichever suits your needs.

The standard package consists of three primary elements:

Psychometric analysis

Numeracy test

Literacy test

The numeracy and literacy tests typically consist of 30 timed questions in three categories, easy, medium and hard.

This can be purchased in a number of ways:

Purchase a single test or a number of tests for £60.00 for the Psychometric analysis and either literacy or numeracy tests and £75.00 for all three. Results will be emailed to a designated person in your organisation.

Purchase a series of tests that will remain active until used. Prices would be based on the above formula and would take into account the length of time the series would be active for.

In the above options we can add questions of your own design, relating to any subject you require for example technical competency, legislation or questions about your organisation (see who's done their homework).

If you put more than 100 people per year through the recruitment process, it may be more cost effective for you to purchase a licence to use the system and questions for a fixed period and administer the tests and results yourself, for example a six month unlimited use licence would cost £5000.00 and a twelve month licence would cost £9000.00. (on-going licence at 20% of the first year fee) If required we can administer the system throughout this period for a negotiated fee.

For those that want to know more about their employees, why not consider using our sub-conscious profiling tools. The iDP (individual development programme)

The iDP modules can be purchased on a similar basis based on £50.00 per test or £300 for all tests for one individual.

Whether you want to buy a single test, or want the whole system, we have an affordable package to help make your recruitment process simple, accurate and cost effective.

If you are a multi national company or an SME, using DeXtraD recruit will add value to your recruitment process.
